WALNUT TREES 9

AND TERMS, ——— 18

Reassurance to Arp friends who may have misconstrued a recent business organization:

Consolidated Nurseries, Inc., enters its first season the largest nursery processing company in the Southwest. Partners in Arp Nursery Company own stock, and recommend any purchaser of processed (**packaged**) rosebushes and assorted flowering shrubs and fruit trees to write Consolidated, Box 311, Tyler, for information.

Arp continues as always, specializing in wholesale production of fine grafted pecan trees and top-quality **FIELD-FRESH** rosebushes for licensed nurserymen, florists and dealers . . . buyers of bulk, **bareroot**, trees and plants.

Every item offered in this pricelist is Arp-grown, and that means Better-Rooted. Consolidated is an Arp customer, assured of a supply by a production contract entered three years in advance. You, too, should come to the source. Your annual rosebush stock requirements, both standard garden favorites and newest patented All-American Award winners, can be assured and tailor-made by a budding or growing contract guaranteeing delivery and stabilizing price.

Yes, Consolidated is a good customer, aiming to raise the standard of nursery processing, to get dead and deteriorated stock off the store counters. A really **LIVE** plant, effectively and attractively packaged, competently distributed and sensibly priced, will do much to rebuild consumer-confidence, customer-acceptance of any product of a legitimate nursery.

FOR BAREROOT ROSEBUSHES AND PECAN TREES,

COME TO ARP. . . . then you'll be sure they're

FIELD-FRESH and really Arp-Grown!

L. B. Dean
Clark Kidd
L. A. Dean

"The annual Nurseryman's Shortcourse, heavily attended by the brains of the business, is source of practical scientific data for easier living. Growers are usually drawn into lively discussion of mutual problems."

Arp Nursery Company Pecan Varieties

BURKETT.—Introduced by J. H. Burkett of Clyde, Texas. Size large, shell thin, kernel plump, flavor excellent. Is one of the most popular varieties. Runs 40 nuts per pound and 55% kernel.

DELMAS.—From Jackson County, Mississippi. Widely disseminated, size large, shell medium thin, kernel plump, quality good. Runs 45 nuts per pound and 48% kernel. Scabs in damper localities.

"SPECIAL." (Sometimes Called MEYHAN),—Originated in Mississippi. Very large nut with thin shell, resembling the Schley quite a bit and seems to be of just as high quality, but is somewhat larger than the Schley. A good individual.

MOORE.—From Jefferson County, Florida. Runs 67 nuts per pound and 49% kernel. Unusually prolific and one of the best commercial varieties for East.

MONEYMAKER.—From Madison Parish, Louisiana. Runs 51 nuts per pound and 46% kernel. Widely disseminated; size medium. Recommended only for eastern portions of the country.

SCHLEY.—Originated in Jackson County, Mississippi. Runs 47 nuts per pound and 61% kernel. An old and widely disseminated variety, and said to be a seedling of the Stuart. A very high-class pecan and an average bearer.

STUART.—Originated in Jackson County, Mississippi. Runs 55 nuts per pound and 44% kernel. An old and widely disseminated variety.

SUCCESS.—Originated in Jackson County, Mississippi. An old and widely disseminated variety, running 37 nuts per pound and 52½% kernel. One of the most valuable Eastern varieties that we have.

TEXAS PROLIFIC.—(Sometimes called Sovereign).—Introduced by E. E. Risien, San Saba, Texas. Runs 48 nuts per pound and 54% kernel. Very prolific and widely disseminated in Texas. A very popular variety.

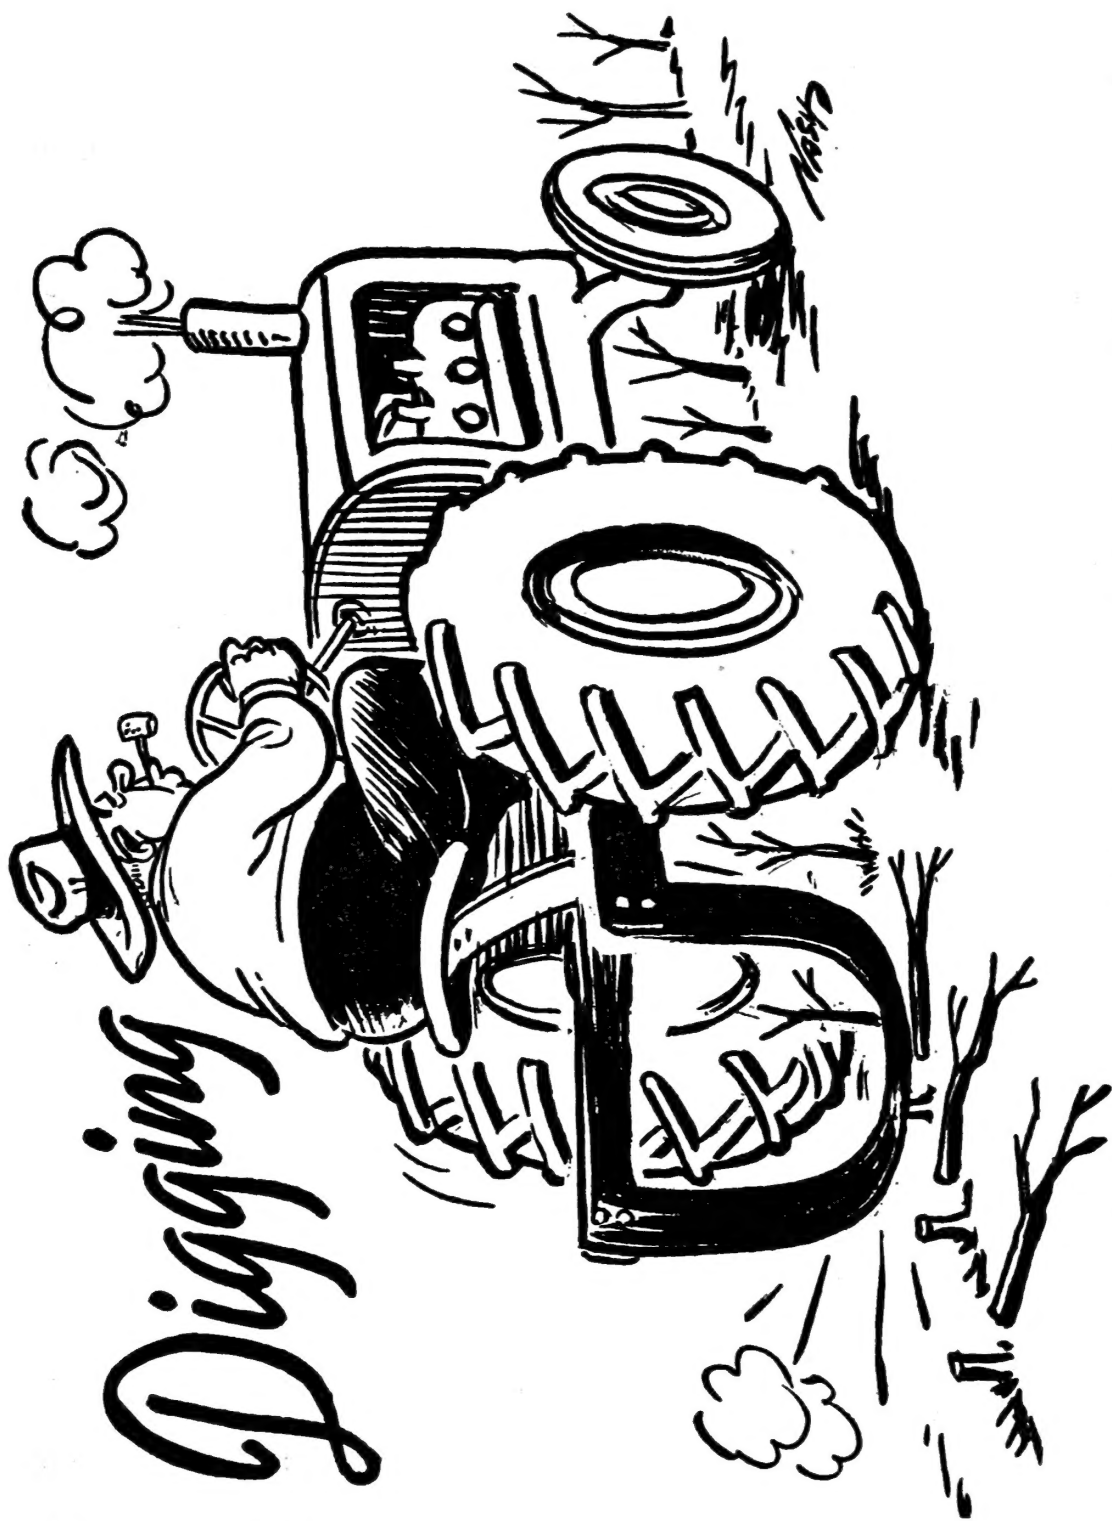

Pecan Varieties (Continued)

WESTERN SCHLEY.—Also introduced by Guy Risien, San Saba, Texas. Runs 59 nuts per pound and 60% kernel. Thin shell and good cracking quality. Resembles the Eastern Schley very much, but probably more valuable for Texas. Very prolific and seems to do well over a wide area.

Nationwide No. 1 "Eastern" Choice of Experts

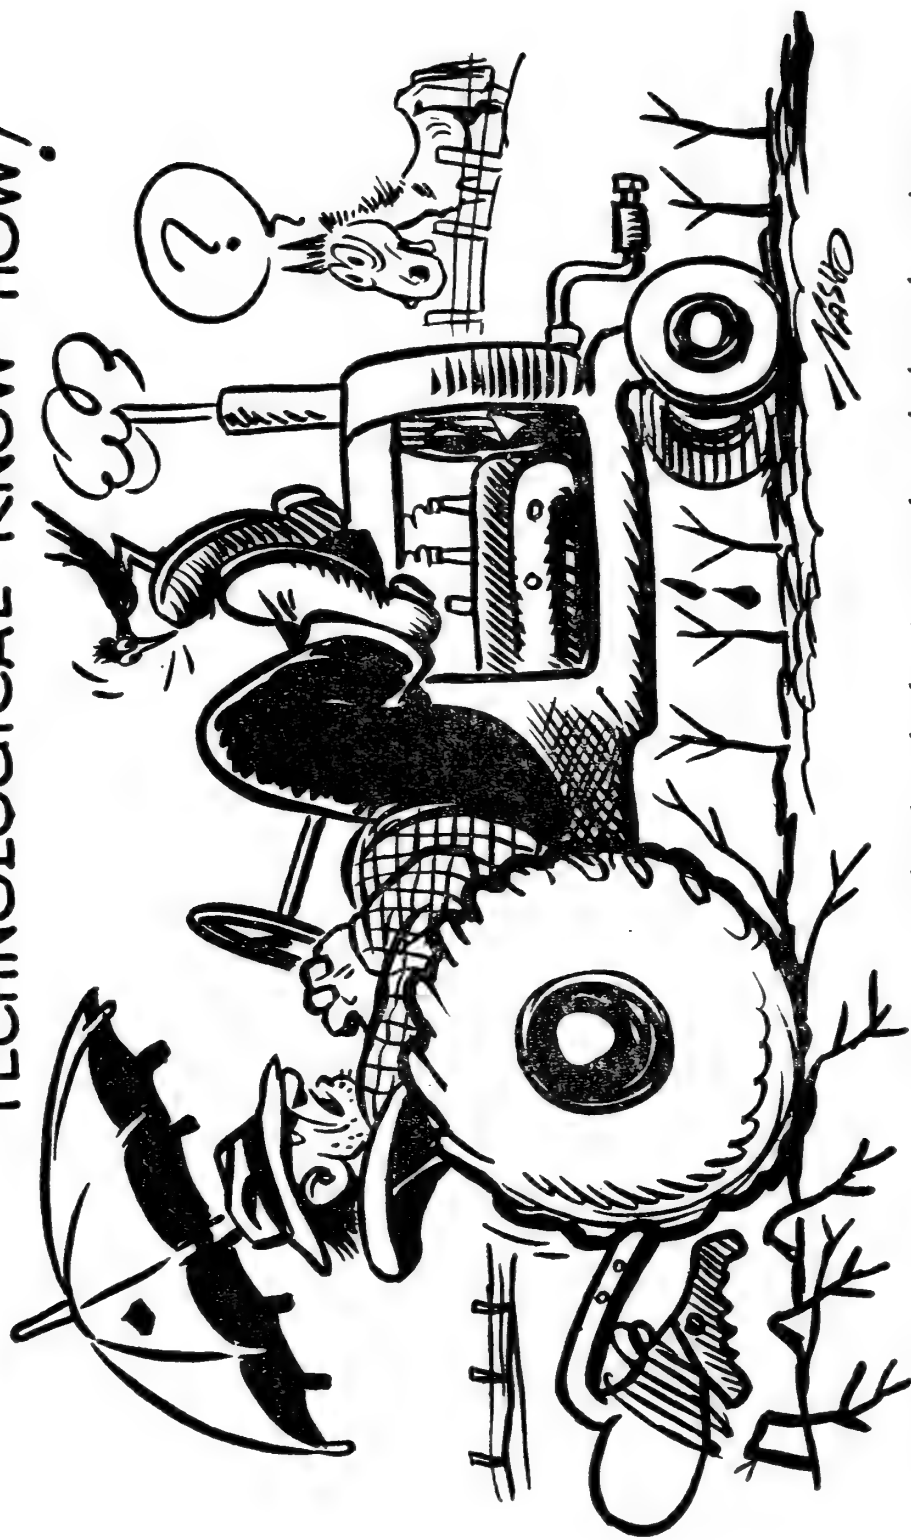

Desirable Pecan (1948-49 Supply Limited)

This variety was introduced many years ago but only recently has it been disseminated to much extent. At present it is one of the most promising thin-shell varieties in the entire southern pecan belt. Grades 40 to 60 nuts per pound, 54 to 58 per cent kernel. A fair sheller. Large attractive nuts with light colored kernel of good flavor. Not an early bearer but moderately prolific. Vigorous tree relatively resistant to fungus diseases. A late ripener. Apparently performing better than the Success under similar conditions.

Desirable Pecan Prices

20th Century Mechanics— TECHNOLOGICAL KNOW-HOW!

"Production costs these days are reduced only by improved methods and equipment. Remember how much growing stock was lost every time you plowed with Old Beck? Just couldn't keep her from a-trompin' and a-scrapin'!"

"Some smart surveyors can show you where 98 percent of business failures are due to 'cockpit trouble'; the boss wears the squeaky shoes. This fellow is only half running a nursery, half fishing, half sleeping, half smoking, half drinking. . . In fact he's not doing much of a job on either."

Grafted Walnut Trees

THOMAS BLACK WALNUT

Giant size improved, grafted Black Walnut. Fastest growing and heaviest producer of easily cracked nuts. Kernels come out in halves. Tree bears very young, generally one year after planting. Delicious flavor. Tree will grow anywhere. Excellent shade tree as well as producer.

WILLSON WONDER ENGLISH WALNUT

Largest nut of all English varieties. Very prolific and fast growing tree. Excellent for shade and timber as well as nuts. Tree has grown to thirty feet and withstood below zero weather.

Thomas Black, Willson Wonder English*

Rose Grades (HT., Rug, HRug, HP)

From Horticultural Grade Standards adopted by American Association of Nurseryman, July, 1948. —Is your grower familiar with the REVISED standards? Here is more for your money.

Grade No. 1

3 or more strong canes, two of which are to be 18 inches and up, with the exception of a few of the light growing sorts, which are to have three or more canes, two of which are to be 16 inches and up, and one cane to be 18 inches and up, branched not higher than 3 inches above the bud union.

Grade No. 1½ or Medium

2 or more strong canes, to be 15 inches and up with the exception of a few of the light growing sorts, which are to have 2 strong canes 13 inches and up, branched not higher than 3 inches above the bud union.

Grade No. 2

2 or more strong canes 12 inches and up, with the exception of a few light growing sorts which are to have 2 or more canes, 10 inches and up, branched not higher than 3 inches above the bud union.

(Pol, HPol, Floribunda and Climbers have own grade standards, slightly different, not reprinted here for purpose of brevity.)

A A R S -All America Rose Selections

Since the Plant Patent Act was passed in the early Thirties, most rose introductions are protected by a patent. Most plants worth registering are worth growing, but to give the consumer a reliable yardstick while building a stable market for the best of the new varieties, All-America Rose Selection's eighteen test gardens coast-to-coast, judged by top-ranking rose experts, annually score the winners. Arp is proud of AARS membership and of licenses permitting production of the world's best, for you.

Supply of AARS winners, unfortunately, is short. But every patented rose offered is already publicized, proved and popular.

TERMS:

- F. Cash Discount . . . 1% —Shipments all F. O. B. Arp
O. To firms with credit established here, Net 30 days.
B. Each item at wholesale is in multiples of 10 of each variety and grade. Broken lots will be charged 10% additional to list price.

A Satisfaction on delivery and true varieties are the only
R guarantees, but these you can depend on. Claims of damage
P or shortage must be made immediately on delivery of merchandise. Adjustments will be as prompt.
Acknowledgment, packing list, and invoice forms for every order are mailed.
